

DOPortfolio

My name is Dominic Onen.

Student name	Dominic Onen
Registration number	25/28259
App name	DOPortfolio (initials D.O. + Portfolio)
Verification code	MOB-A2-8259 (last four digits of the registration number: 8259)
Android package	rw.ac.ines.ug2528259.doportfolio
Course	Mobile Application Development, SWE 3409, INES-Ruhengeri

Concept

A recruiter asks for an introduction through a small Android app instead of a paper CV. DOPortfolio opens with the sentence “My name is Dominic Onen.”, then shows a short biography, skills, education and real projects. It works fully offline, so it can be installed and shown in a meeting without a connection. The owner can edit the headline, biography, primary skill and availability, and set a profile picture. Everything is kept on the phone.

Intended recruiter

A hiring manager or lecturer at an internship or innovation challenge who has about two minutes, may be holding the phone in one hand, and may use a larger system font. They need identity first, evidence second, and no sign-in or setup.

Visual direction

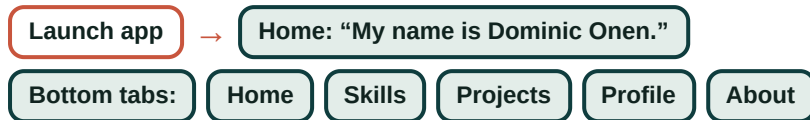

Calm and professional: a deep teal (#0F3D3E) for structure on a warm paper background (#F6F3EC), a terracotta accent (#C8553D) for small highlights, and white cards with a thin border. Large clear headings, generous spacing, rounded corners. Dark text on light surfaces everywhere so contrast stays high (measured values on page 5).

Design goals

Goal	How the design meets it
Identity within seconds	The first sentence on Home is “My name is Dominic Onen.”, above the headline.
Credible evidence	Skills with honest levels; projects with problem, contribution and technology.
Works anywhere	No network needed; only GitHub links on project pages need internet and say so.
Safe to edit	Four validation rules with messages under each field; invalid saves are blocked.
Readable for everyone	Flexible layout, 48 px touch targets, labels for screen readers, text scales with system size.

User flow

The app starts on Home. Five bottom tabs are the major sections. Only Projects contains a stack route.

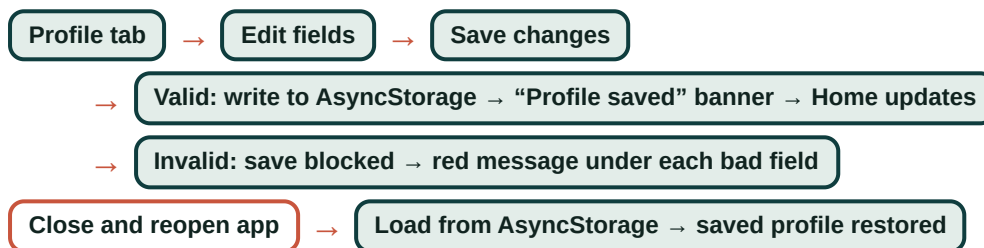

Stack inside the Projects tab

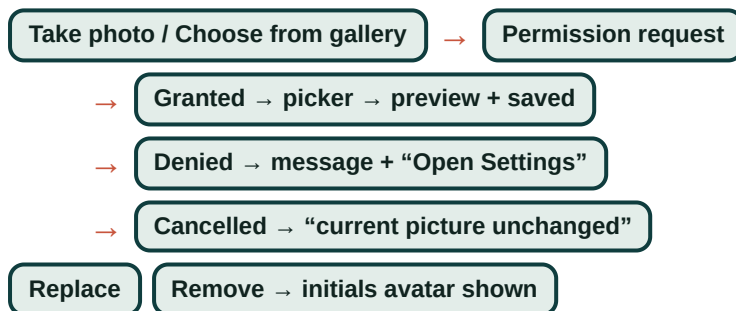

The tab navigator keeps each tab mounted, so going Back, or switching tabs and returning, does not reset the session.

Profile editing and saved state

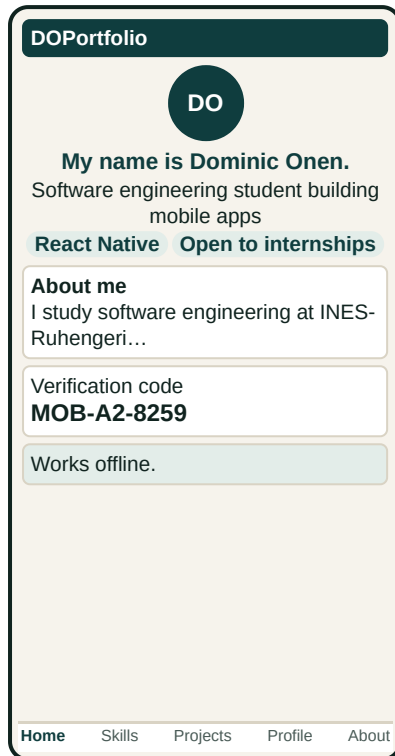

Media selection

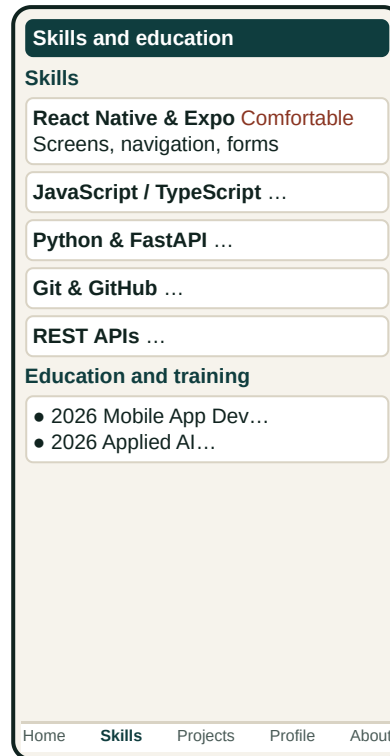

Information architecture

Tab	Contains	Needs internet?
Home	Name sentence, picture or avatar, headline, chips, biography, verification code	No
Skills	Six skills with levels; education and training timeline	No
Projects	Project list → Project Details (problem, contribution, technology, link)	Only the GitHub link
Profile	Picture actions, editor (headline, biography, primary skill, availability), Save, Reset	No
About	App name, student name, registration number, code, version, data-use statement	No

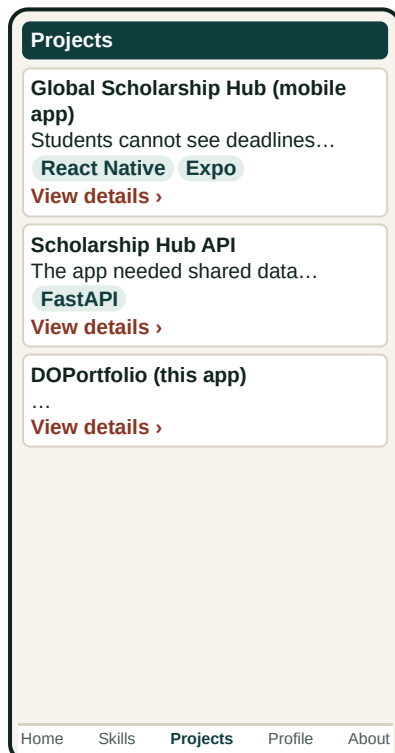

Annotated wireframes: Home, Skills, Projects, Project Details

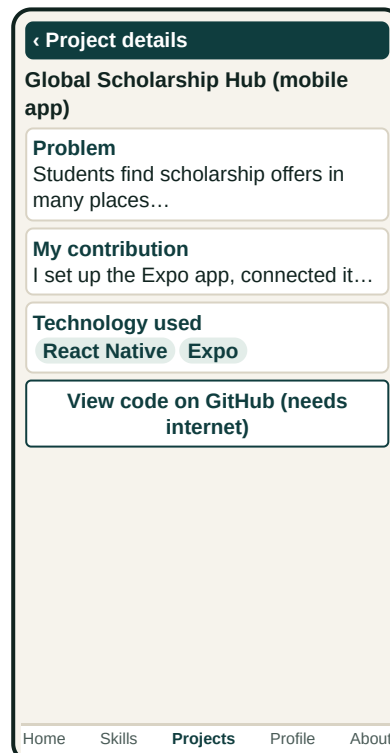

- 1 Name sentence is first.
- 2 Avatar shows initials until a photo is saved.
- 3 Chips come from the editable profile.
- 4 Code card for verification.
- 5 Offline label.

- 1 Reusable skill card: name, level, note.
- 2 Timeline is a reusable component (dot, line, text).
- 3 Empty state if no skills.

- 1 Whole card is one button.
- 2 Technology chips.
- 3 "View details" opens the stack route.
- 4 Empty state if no projects.

- 1 Back arrow returns to the list.
- 2 Problem, contribution, technology as cards.
- 3 Link is labelled as needing internet.

Layout rules shared by every screen

Each screen is one scrolling column (Flexbox) with 16 px padding and 16 px gaps. Cards have no fixed height, so longer text or a larger system font makes the card grow instead of being cut off. Rows that hold a label and a value wrap onto two lines when there is not enough width.

Annotated wireframes: Profile Editor, errors and empty states

Permission for the camera was denied, so no picture was changed. You can allow it in Settings.

Permission needed

Allow camera access in Settings to use this option.

Not now Open Settings

Cancelled. Your current picture is unchanged.

No projects yet

Projects added to the portfolio will appear here.

Home Skills Projects **Profile** About

1 Permission denied message with Open Settings. **2** Cancelled picker keeps the current picture. **3** Empty state card.

Validation rules

Field	Rule	Message shown
Headline	Required, 8 to 60 characters	"Headline must be at least 8 characters." and similar
Short biography	Required, 30 to 280 characters	"Biography needs at least 30 characters (now N)."
Primary skill	Required, 2 to 30 characters, must contain letters	"Primary skill is required." and similar
Availability	One option must be chosen	"Choose an availability status."

Colour and contrast (measured)

Use	Foreground on background	Contrast
Main text	#10231F on #F6F3EC	14.8 : 1
Button label	#FFFFFF on #0F3D3E	11.9 : 1
Secondary text	#4A5B57 on #F6F3EC	6.5 : 1
Error text	#A4262C on #FFFFFF	7.3 : 1
Accent text (levels, "View details")	#8A3522 on #FFFFFF	8.0 : 1
Chip text	#0F3D3E on #E3EDE9	10.0 : 1
Success banner	#1B6B3A on #DDEF3E	5.5 : 1
Error banner	#A4262C on #F6DADA	5.5 : 1

All pairs are above 4.5 : 1, the WCAG AA level for normal text. Error and success states never rely on colour alone: they also use words.

Typography and spacing

Element	Size	Weight
Home name sentence	28 px	Extra bold
Screen and section headings	20 to 26 px	Bold
Body text	16 px, line height 24	Regular
Hints and secondary text	13 to 14 px	Regular or semibold

The system sans-serif font is used so text matches the phone. Spacing uses a scale of 4, 8, 16, 24 and 32 px; corners are 8 or 14 px.

Accessible labels and behaviour

Decision	Detail
Labels	Every button, field, option and image has an accessibility label; project cards add a hint.
Roles	Headings use the header role; availability options use radio roles with selected state.
Touch targets	Buttons and inputs are at least 48 px high.
Messages	Errors and banners are live regions so a screen reader announces them.
Large text	Layouts use flexible height and wrapping rows, so cards grow with the system font size. Only the five tab labels are fixed at 12 px so all tabs stay on one line.
Narrow phones	Single column with 16 px padding; no horizontal scrolling.
